Re Report to the Supreme
Court on Permanent Disbarment
and In Re Wilson

Dear Judge Grant

Please excuse this hand printed letter; my secretary is away. I responded in a timely manner to the above report. Please accept this supplement. I am a lawyer admitted since 1970. out of time

Many years ago I was the President of the Morris County Bar and for 10 years I was the secretary of District X Ethics Committee. I am a member of the Professionalism Committee and asked to speak on a Professionalism Zoom about the report. I have now read the report 6 times.

(over)

I side with Judge Gallipoli's dissent.
Although my practice is chancery based
and land use (seeking variances and
waivers) applications and per litigation.

The bright line test of Wilson should
be maintained. Equity and second chances
do not belong to people who take money.
My best friends are lawyers and I stand
up for them. But this is different. Lawyers
who take money should not be given a
second chance. In my time as Secretary
of District X, 2 lawyers stole and stood
behind religious institutions, a drug addict
was cleared to return and then stole money
as a legal malpractice Plaintiff's lawyer, and
lastly we had a lawyer who robbed a bank!
These people are sad geniuses and devils.

The report is extremely thorough and presents
enough hurdles but devils lawyers will use
their business accounts which do not require
multiple signatures. I believe the Court will adopt
the report but lawyers like this can't have
checking accounts of any kind. They must
get an allowance like high school students.
Respectfully
